Product Designer with 5+ years of experience in emerging tech and a multidisciplinary background spanning game design, 3D spatial design, and entertainment marketing. Experienced in UX design, user research, usability testing, and systems thinking, with a track record of delivering wireframes, prototypes, and shipped products across games and social platforms. Known for collaborating closely with cross-functional teams to translate complex problems into intuitive, high-impact experiences.

WORK EXPERIENCE

Meta Reality Labs — Product Designer

Remote, US (Seattle, WA) | Jun 2021 – Apr 2026

- Led end-to-end UX design for Horizon Worlds preteen accounts, designing parental approval flows, content rating systems, age controls, and GenAI parental controls. The launch drove meaningful growth in new monthly active users and achieved the strongest day-one retention among key age segments.
- Designed and launched internal tools for social VR live event hosting, enabling creators to build, manage, and host live events; conducted user research and usability testing to refine creator workflows.
- Designed Name Tag Twinning, a social discovery feature that surfaced shared outfits and stickers between users in virtual spaces, achieving a 20% post-encounter follow-request rate.
- Led spatial UX design for Horizon Worlds’ social hub, NUX 2.0, delivering 23+ NPC designs to support a more diverse and engaging onboarding experience; facilitated weekly user research and competitive analysis sessions with cross-functional partners to guide design decisions.
- Defined interaction models and design patterns for Android and iOS during cross-platform product sprints, partnering closely with engineering to ensure a consistent experience across VR, PC, and mobile surfaces.

Facebook — Product Designer Intern

Menlo Park, CA | Jun 2020 – Aug 2020

- Defined an error-handling framework and diagnostic workflows for complex product systems, reducing ambiguity across engineering teams and improving implementation speed through rapid prototyping and cross-functional alignment.

CJ E&M — Film Marketing Senior Analyst

Seoul, South Korea | Jan 2014 – Jul 2017

- Coordinated with artists, film production teams, and marketing stakeholders to deliver scalable promotional assets across 10+ marketing campaigns.
- Contributed to the marketing strategy for *The Admiral*, the highest-grossing film in South Korean history, reaching over 17 million tickets sold.

Nexon Korea — Game Designer, Vindictus

Seoul, South Korea | Jul 2012 – Jul 2013

- Designed and balanced core game systems for a AAA MMORPG, including monster behaviors, weapon mechanics, and quest narratives.
- Led the design of an interactive pet system that turned virtual pets into a social engagement driver, resulting in the game’s top-grossing premium item.
